No. B-8607 of 1911.

From

THE HONOURABLE SURGEON-GENERAL H. W. STEVENSON, I.M.S.,
Surgeon-General with the Government of Bombay;

To

THE SECRETARY TO GOVERNMENT,
General Department, Bombay.

Office of the Surgeon-General with the Government of Bombay:
Poona, 11th April 1911.

Sir,

I have the honour to submit, for the information of Government, the Annual Report on the Lunatic Asylums of the Bombay Presidency for the year 1910.

Buildings and Repairs.

2. The ordinary repairs to asylum buildings were carried out by the Public Works Department as usual, and they are in good order.

At Ratnágiri Asylum, sweepers quarters and a small work shed for females were completed.

At Hyderabad, the repairs and alterations to the women's yards were completed with considerable improvement to the accommodation.

At Naupáda, Ahmedabad, Dhárwár and Ratnágiri Asylums there still remain works of extension and improvement to be done as soon as funds are available.

Water-supply.

3. The supply was good and sufficient at all the asylums with the exception of Colába, Ratnágiri and Naupáda.

At Colába there was shortage during the month of April. The work of laying larger mains to this portion of Bombay is reported to be nearing completion.

At Ratnágiri the water works have now been taken over by Government, and a full supply may be expected in future. During the year there was shortage and the employment of bhistis was necessary.

At Naupáda, it is reported that the asylum well runs low in the hot weather, and it is necessary to bring water in from outside. The shortage is not serious.

Remarks on the Statistical Tables.

STATEMENT No. I.

4. The total number of inmates was 1,357 as compared with 1,355 in 1909. The admissions amounted to 339 which is the same figure as in 1909. Re-admissions number 34 or 9 in excess of 1909.

Naupáda Asylum shows the largest increase in admissions, the number being 43 more than in 1909.

The daily average strength.

The daily average strength was 986·1 (786·6 males and 199·5 females); in 1909 it was 988·6 (774·6 males and 213·7 females).

Discharges and cures.

Of the total treated 134 were discharged cured against 120 in 1909. 103 insanes were transferred to the care of friends as compared with 104 in the previous year, and of the insanes returned under this head 82 had improved while under treatment, 21 had not.

Of the 16 insanes returned as discharged "otherwise" 6 escaped from the asylums, 6 were sent to other hospitals for treatment, 3 were transferred from the criminal to the non-criminal list, and 1 was removed to another asylum.

Sickness.

The daily average of sick was 28·0 as compared with 23·9 in the previous year. The general health of the insanes was on the whole satisfactory.

Mortality.

The number of deaths in the asylums was 126 as compared with 130 in 1909. The death-rate in individual asylums closely corresponds to that of last year. In Naupáda Asylum the death-rate was again excessive, and there was no epidemic of cholera this year as in 1909 to account for it. The deaths are reported to have been due chiefly to diarrhœa (21) and debility (22).

Many of the patients on admission are in a miserable state through want of proper food and attention. Also the care of sick insanes is exceedingly difficult, but, allowing for these, the death-rate at this asylum is larger than it ought to be, and its situation is, I think, responsible to some extent. During a heavy monsoon the place is very wet, and insanes stand damp and chill very badly. When the new asylum at Yerávda is open, it may be possible to transfer some of these cases above-ghâts for treatment.

The death-rate at Hyderabad Asylum also was high during the year, and the Superintendent reports cases resembling epidemic dropsy, but differing in certain particulars from that disease, as described by Manson and others.

One death from hydrophobia is reported from Colába Asylum. The patient was bitten by a rabid dog, and though at once sent to Kasauli and treated there, he developed the disease and died one month and eleven days after his return.

The chief causes of mortality in the asylums generally were diarrhœa 27, debility 25, dysentery, pneumonia and tuberculosis 11 each, and malaria 8.

The *ratio* of deaths to the daily average strength per cent. was 12·8 against 13·1 in 1909.

Epidemics.

There were 3 cases of plague at the Colába Asylum, 2 males and 1 female. The latter was an imported case. The woman arrived from a plague-infected station and developed plague within one week of her admission to the asylum. The two former cases may be attributed to local infection, as plague was prevalent amongst some of the residents living outside the asylum precincts. All the cases were sent to the Marátha Plague Hospital for treatment. One died, and two were sent back, cured.

Two fatal cases of choleric diarrhœa occurred at the Ahmedabad Asylum during the period that cholera was prevalent in the city.

Statement No. II.

Return of criminal lunatics.

The number of criminal insanes remaining in confinement on the 1st of January 1910 was 157, which, with the 39 admissions during the year, gave a total population of 196 as compared with 199 in the previous year. The daily average strength of these insanes was 153·6 against 156·5 in 1909.

Statement No. III.

The religion, sex and residence of the insanes admitted during the year.

Of the 373 admissions and re-admissions, Hindus numbered 199, Mahomedans 101, Europeans, Eurasians and Native Christians 20 each; while 33 belonged to other castes.

Statement No. IV.

The previous occupations of the insanes admitted during the year.

Labourers furnished the largest number of admissions as usual, namely, 38, mendicants and vagrants furnished 30, domestic servants 29, merchants and traders 28, cultivators 21 and clerks 18. In 67 cases the previous occupation was not reported, and 40 were said to have had no occupation. The remaining 108 belonged to various occupations.

Statement No. V.

The ages of the insanes admitted during the year.

44 insanes were under 20 years on admission, 272 were between 20 and 40 years and 57 were between 40 and 60 years.

Statements Nos. VI and VII.

The types and causes of insanity among the insanes treated during the year.

The various types of insanity treated were mania 682, melancholia 389, dementia 133, delusional insanity 77, idiocy 65, mental stupor 6 and general paralysis of the insane 1.

Of all the insanes treated, four were declared to have recovered, or were under observation as not yet diagnosed.

Insanity was ascribed to specific causes in 756 cases, of which 623 were physical and 133 moral. Of the physical causes, the use of intoxicating drugs, over-indulgence in spirituous liquor, previous attacks, fever, epilepsy, hereditary causes and mental trouble accounted for most of the admissions. The cause of the insanity was not known in 601 cases.

Statement No. VIII.

The cash accounts of the asylums.

The total receipts and expenditure during the year amounted to Rs. 2,42,157-2-10, as compared with Rs. 2,63,279-7-2 in 1909.

The receipts from paying patients amounted to Rs. 27,062-1-0 against Rs. 26,634-10-11 in 1909 which shows an increase of Rs. 427-6-1 over that year.

The stores received from the manufacturing department yielded Rs. 3,062-11-3 or Rs. 102-15-8 more than in the previous year.

If the sums received from paying patients, and from the sale of goods to the public, and from those made over to the asylums for asylum purposes, etc., be deducted from the total expenditure incurred during the year, the net cost stands at Rs. 1,74,282-15-4 against Rs. 1,96,826-5-6 in 1909, which shows a decrease of Rs. 22,543-6-2 when compared with that year.

The decrease may be attributed chiefly to a reduction in the charges on account of works done by the Public Works Department, which spent Rs. 17,130-2-2 against Rs. 39,286-5-9 in the previous year.

The increase in the expenditure under the head "Cost of Stationery, etc.," was due to the adjustment, during the year under report, of the cost of two Typewriters (Rs. 761-4-0) supplied to the Naupáda and Ahmedabad Asylums.

Rs. 1,600-10-8 were spent on the amusement of insanes, compared with Rs. 1,703-10-1 in 1909.

STATEMENT No. IX.

The sanctioned establishment as it stood on 31st December 1910.

The monthly cost of the establishment amounted to Rs. 6,208-8-0 as compared with Rs. 6,223-8-0 in 1909.

STATEMENT No. X.

The receipts and expenditure on account of manufactures in the asylums.

The total receipts from the manufacturing department amounted to Rs. 6,031-5-0 and the debits to Rs. 1,577-3-5 against Rs. 5,491-11-4 and Rs. 1,839-9-0, respectively, in the preceding year.

The amount of profit realized by the sale of manufactures was Rs. 4,454-1-7 or Rs. 801-15-3 more than in the year 1909.

The average number of insanes employed on manufactures was 342·2 against 333·9 in the previous year.

Visitors.

5. The official visitors were regular in their attendance at all the asylums.

Management.

6. The superintendence of the asylums has been satisfactory throughout the year, and the Subordinate Medical Officers have been well reported on with regard to the discharge of their duties. From several Superintendents the same representations are received regarding the Warder Staff. They are discontented, and the only class of men, which it seems possible to obtain, is usually incapable of being taught the ordinary duties of a Warder in an asylum. If a more intelligent individual is enlisted, he soon leaves for better pay and more congenial work elsewhere. The rates for ordinary unskilled labour have risen largely during the past few years, and a man of fair intelligence can easily obtain higher pay than he can as a Warder, and at the same time have much more liberty. It must be recognised that the work of an Asylum Warder, which means constant association with, and continual care of insanes, with no holidays, is one which no man who is worth anything will take up, unless the pay and other conditions are such as to compensate him for the life he has to lead.

If the care of the inmates of the asylums is to be carried out as it ought to be, the provision of an adequately paid and trained staff of Warders is essential. In these days men of the class required cannot be obtained for Rs. 8 per mensem, which is the pay of a 2nd Class Warder.

I have the honour to be,

Sir,

Your most obedient Servant,

H. W. STEVENSON, Surgeon-General, I. M. S.,
Surgeon-General with the Government of Bombay.

The capacity of the Colába Lunatic Asylum is, at 50 superficial feet per patient, for 90 Europeans—70 males and 20 females, and for 168 Indians—104 males and 64 females; the maximum number of European lunatics confined on any one night was 27 males and 13 females, and that of Indian lunatics 84 males and 48 females.

The capacity of the Narotamdas Madhavdas Lunatic Asylum, Naupáda, is, at 140 superficial feet per paylug patient, and at 80 superficial feet per pauper patient, for 198 males and 42 females; the maximum number of lunatics confined on any one night was 214 males and 49 females.

The capacity of the Ratnágiri Lunatic Asylum is, at 50 superficial feet per patient, for 73 males and 39 females; the maximum number of lunatics confined on any one night was 80 males and 27 females.

The capacity of the Poona Asylum is, at 50 superficial feet per patient, for 103 males and 24 females; the maximum number of lunatics confined on any one night was 106 males and 28 females.

The capacity of the Dhárwár Lunatic Asylum is, at 50 superficial feet per patient, for 64 males and 24 females; the maximum number of lunatics confined on any one night was 71 males and 23 females.

The capacity of the Ahmedabad Asylum is, at 64 superficial feet per patient, for 90 males and 18 females, and at 80 superficial feet per patient for 20 male criminal lunatics; the maximum number of lunatics confined on any one night was 109 males and 20 females.

The capacity of the Hyderabad Asylum is, at 74 and 70 superficial feet per patient, for 125 males and 23 females respectively; the maximum number of lunatics confined on any one night was 150 males and 13 females.

* Transferred to Hospitals for treatment.

† One transferred to another Asylum and two escaped.

‡ Transferred from the criminal to non-criminal list.

¶ Escaped.

§ Transferred from the criminal to non-criminal list.

† One transferred from the criminal to non-criminal list and three escaped.
